 Version 1.0 AUG 2016

Perkins and its team of over 500 engineers have led the field in the design and construction of high-performance diesel engines for over 75 years.

Here at AllightSykes, we use Perkins engines in our mobile lighting towers, pumps and compressors because, like you, we insist on the very best in technology, efficiency, reliability and durability.

We're also tremendously proud to continue to be Australia's exclusive distributor of loose engines.

INDUSTRIAL POWER RANGE

400 Series

The 400 Series leads the way in the compact power market.

Available as two, three or four cylinder water-cooled options, the engines provide clean, quiet and economical power across a band of 8.2 to 49.2 kW (10.9 to 65.9 hp). And all from a super compact engine envelope of just 0.08-0.25m³.

Naturally aspirated, turbocharged and after-cooled variants are all available in the 400 Series range, with the additional choice of mechanically-balanced ratings.

850 Series

The 850 Series is a range of tough four cylinder 3.3 litre engines that provide clean, quiet, and cost effective power to meet EPA Interim Tier 4 / EU Stage IIIA legislation.

Covering a power range of 47 to 62 kW, they come as either naturally aspirated (indirect injection) or turbocharged (direct injection) models.

GENSET POWER RANGE

Every year, Perkins produces more than 90,000 diesel and gas engines specifically for combined heat and power (CH). They are designed to suit all power generation applications of up to 2264 kVA in diesel power or 1008 kWe on gas.

1100 Series

Covering a power band of 36.9 to 186 kW and offered with either three, four or six cylinder configurations.

1300 Series

The 1300 Series EDi is a family of in-line six cylinder turbocharged and turbo aftercooled 7.6 litre and 8.7 litre engines. They have a common profile and are targeted towards the electric power generation and industrial sectors.

2000 Series

The Perkins 2000 Series is a range of 13, 15 and 18 litre diesel engines providing prime and standby power from 350-700 kVA at 1500 rpm, and 320-600 kWe at 1800 rpm.

4000 Series

The 4000 Series range of engines comprises six, eight, 12 and 16 cylinder diesel and spark ignited gas engines.

Marine Power Range

The Perkins Marine Power range covers marine engines ranging from 64 to 221 kWm (87 – 300 hp) and Auxiliary Marine Engines from 12.3 to 146 kWm (16.4 - 195.7 hp). Emission compliant and environmentally friendly, these engines are trouble free, clean, compact, reliable and durable.
